This biography of Raymond Mays includes complete histories of ERA and BRM, including race summaries, a foreword by Mays himself. Personal letters addressed to the author from Alfred Owen, David Brown, Tony Rudd, Rivers Fletcher, Bob Gerard, Ken Richardson, Juan Fangio, and many others add intimacy to the story. Illustrated with over 100 of the author's colour paintings. First Published in 1998. Routledge is an imprint of Taylor & Francis, an informa company. Law for Non-Law Students is written in a clear and readable style and aims to make the law understandable for readers at undergraduate or comparable level. It explains the practical influences under which the law has been formed, so that the student will be better able to understand why the law has developed in the way that it has. It gives lots of straightforward examples as to how the law works in practice and aims to equip students with the ability to appraise the effectiveness of the law in a particular circumstance rather than simply providing a list of rules for the student to regurgitate at exam time. The facts of the more important cases are given in some detail to enable the student to appreciate the range of factors which the court may have taken into account in reaching its decision. The new edition has been updated to take account of all recent developments, both in relation to statute and to case law. Certain chapters, particularly in the area of sale of goods, have been substantially rewritten and expanded in an attempt to give more detail, while at the same time remaining student-friendly. New chapters on Agency and Negligence have been added. This new edition should be suitable for most courses which have a law element. This is the real life story of Brian a retired marine engineer. The book starts with his memories from World War 2 when he lived in Essex during the Battle of Britain and the following years. He tells many humorous stories about his travels abroad as a marine engineer and an insurance engineer. The book covers a period of employment in Libya when Gaddafi nationalized the oil company he was working for. During the final chapters he deals with redundancy and finally retirement. It is a story of an interesting life well spent by someone with a keen sense of humour. Complete year-by-year history of the Trophy (and unit construction Tiger) twins from 1949 to 1983. Includes original factory model photos, technical specifications, colour schemes, engine & frame numbers, model type identification and details of Trophy & Tiger achievements. The complete source

book. Fully updated and revised, this comprehensive and informative textbook provides readers with an overview of current consumer sales law and equips them with a view of how this fast-changing subject has, and will continue to develop through the inclusion of new reform proposals. This book analyzes the interaction of consumer sales law with politics, the appeal of consumer protection to politicians and the influence of the European Union and the EU Directives. It also discusses the removal of consumer sales law from its traditional realm of legal professionals to consumer and debt advisors and public officials with the power to seek injunctions to protect consumers. In addition to this, it: fully integrates both the Unfair Commercial Practices Directive 2005 and the Consumer Credit Act 2006 into the basic 1974 Act explains how the sale of Goods Act 1979 has been modified by the 1999 Directive combines the public protection of consumers under the Enterprise Act 2002 (e.g. Office of Fair Trading) is supplemented by comprehensive e-updates on its Companion Website, keeping the content current between editions. Written by an author with forty years experience of teaching sales and finance law to undergraduates, this textbook is an essential tool for all undergraduates studying commercial and consumer sales law. This title shows the reader how to restore a TR cost-effectively. Drawing from both the author's experience and the knowledge of various TR specialists and professional restorers, this guide covers complete restoration of the cars, including how to overcome common problems. Logistics management, 3/e is essential for creating value for both customers and stakeholders. Effective Logistic chains help organizations to compete in both global and domestic markets. New Scientist magazine was launched in 1956 "for all those men and women who are interested in scientific discovery, and in its industrial, commercial and social consequences". The brand's mission is no different today - for its consumers, New Scientist reports, explores and interprets the results of human endeavour set in the context of society and culture. Pleadings Without Tears has become established as one of the most successful books on practical legal drafting in the context of litigation. This new eighth edition is fully updated to take account of Civil Procedure Rule (CPR) changes since the last edition. The book takes a practical and insightful look at the subject of legal drafting, enabling the reader to become more confident in approaching this often unnecessarily daunting subject. It focuses on core skills and fundamental rules while clearly addressing each stage of the process and goes beyond a straightforward setting out of the precedents and authorities relevant to statements of case. It gives clear examples of how to set out relevant matters with clarity and precision and encourages the reader to give full consideration to concise and clear identification of the subject matter of the action, the issues of the case and the parties' respective positions in respect to those issues. With a wealth of practical examples and anecdotes - and illustrated throughout with cartoons - the light and entertaining style, combined with detailed analysis and explanation, enables the reader to easily acquire a good understanding of drafting. When Fiat entered rallying in 1970, its ultimate aim was to become World Rally Champion and the 131 Abarth of 1976-1980 provided the machinery to make that possible. It started winning World rallies within months of being launched, and in 1977, 1978 and 1980 the 'works' team also won the World Championship for Makes, and set every standard by which Rally Giants were to be judged. Was there ever any doubt that successors like the Lancia Rally 037 and the Delta Integrale would eventually come from the same stable? The story of the world's most admired 4x4. This book will appeal to all Range Rover enthusiasts, offering concise but comprehensive coverage of one of the most admired British cars. Survival data consist of a single event for each population unit, namely, end of life, which is modeled with a life distribution. In contrast, many applications involve repeated-events data, where a unit may accumulate any number of events over time. Examples include the number and cost of repairs of products, the number and treatment costs of recurrent disease episodes in patients, and the number of childbirths to statisticians. This applied book provides practitioners with basic nonparametric methods for such data, particularly the plot of the estimate of the population mean cumulative function (MCF), which yields most of the information sought. Recurrent Events Data Analysis for Product Repairs, Disease Recurrences, and Other Applications is the first book to present a simple, unified theory that includes data on costs or other "values" of discrete events, not just the number of events. It surveys computer programs that calculate and plot the MCF estimate with confidence limits, shows their output, and explains how to interpret such plots. Many such calculations can be easily done with a pocket calculator or spreadsheet program. Also, the book introduces basic Poisson and Cox regression models and parametric models, including homogeneous and nonhomogeneous Poisson processes and renewal processes.
