The Almighty Dollar Sep 17 2021 The dollar is the lifeblood of globalisation: China holds billions in reserve for good reason. Greenbacks, singles, bucks or dead presidents, call them what you will, \$1.2 trillion worth are floating around right now - and half the dollars in circulation are actually outside of the USA. But what is really happening as these billions of dollars go around the world every day? By following \$1 from a shopping trip in suburban Texas, via China's Central Bank, Nigerian railroads, the oil fields of Iraq and beyond, The Almighty Dollar answers questions such as: why is China the world's biggest manufacturer - and the US its biggest customer? Is free trade really a good thing? Why would a nation build a bridge on the other side of the globe? In lively and entertaining prose Dharshini David lays bare these complex interrelationships through the simple story of one dollar as it moves through the opaque international system. This is essential reading that gets to the heart of how our new globalised world really works.

Incredible Journeys Sep 25 2019 'A compelling investigation of navigation in the animal kingdom.' Mail on Sunday 'David Barrie, who himself has sailed the oceans using a sextant, is passionate about navigation and describes in delightful detail the myriad ways in which animals get around ... eye-opening book.' Frans de Waal, New York Times 'Only a sailor could relate the navigational powers of both humans and animals with such appreciation, excitement, and precision. Thank you, David Barrie, for taking us along on these riveting voyages by sail and wing, hoof and flipper. We arrive surprised, delighted, and awed.' Sy Montgomery, author of *The Soul of an Octopus* 'Immensely entertaining... [Barrie] is an admirably reliable and assiduous guide to what we do and don't yet know.' Andrew Holgate, Sunday Times 'Barrie has a good eye for colourful detail.' Kathryn Hughes, Mail on Sunday 'This is a must-read for anyone fascinated with the wonders of nature.' Publishers Weekly In *Incredible Journeys*, award-winning author David Barrie takes us on a tour of the cutting-edge science of animal navigation, where breakthroughs are allowing scientists to unravel, for the first time, how animals as various as butterflies, birds, crustaceans, fish, reptiles and even people find their way. Weaving interviews with leading experts on animal behaviour with the groundbreaking discoveries of Nobel-Prize winning neuroscientists, Barrie shines a light on the astounding skills of animals of every stripe. Dung beetles that steer by the light of the Milky Way. Ants and bees that navigate using patterns of light invisible to humans. Sea turtles, spiny lobsters and moths that find their way using the Earth's magnetic field. Salmon that return to their birthplace by following their noses. Baleen whales that swim thousands of miles while holding a rock-steady course and birds that can locate their nests on a tiny island after crisscrossing an entire ocean. There's a stunning diversity of animal navigators out there, often using senses and skills we humans don't have access to ourselves. For the first time, *Incredible Journeys* reveals the wonders of these animals in a whole new light.

The Incredible Journey Jan 02 2023 A classic Canadian story of the bravery and ingenuity of three animals who find their way home. An Incredible Journey Sep 29 2022 In May 1935, 22-year-old Max Reisch and 19-year-old Helmuth Hahmann set out in a small motor car to find a land route from India to China. Their journey across Asia took them from Haifa to Tokyo. In this lively account, the author regales us with one story after another, struck with wonder or struggling against disaster in countries which deeply concern us today: Iraq with its oilfields, ancient Iran in the throes of modernisation, proud Afghanistan, and British India with its stunning variety of civilisation. Before the building of the Burma Road, driving from India to southern China meant sinking over the axles in mud on forest tracks and crossing torrents on rickety ferryboats. It also meant encounters with strange and fascinating peoples and places. With war already on the horizon, Reisch and Hahmann completed their round-the-world trip via Japan and the United States, arriving back in Vienna in December 1936. Originally written by Max Reisch in German, this brand new English translation by Alison Falls captures all the excitement of the journey, and features fascinating historical photos of the journey from the Reisch archives.

Changing How the World Does Business Nov 27 2019 In a resort town turned internment camp, a female prisoner is brutally murdered Before the war, the hotels of Vittel hosted the wealthiest members of French society. Now, in the winter of 1943, two of France’s most luxurious resorts have been converted into an internment camp for British and American women who failed to escape the country when the German army stormed across the border. For two years, the

prisoners have lived quietly, surviving on Red Cross aid packages, but now they are beginning to die. An American woman is found stabbed through the heart with a pitchfork. By the time inspectors Jean-Louis St-Cyr and Hermann Kohler arrive from Paris, rigor mortis and the February frost have frozen her solid. In her pockets are Cracker Jacks and Hershey bars--bribes intended for one of the guards. To bring justice to Vittel, St-Cyr and Kohler will have to unravel the conspiracy that is at the heart of this luxurious, elegant hell.

Walking the Amazon Dec 21 2021 In April 2008, Ed Stafford began his attempt to become the first man ever to walk the entire length of the River Amazon. Nearly two and a half years later, he had crossed the whole of South America to reach the mouth of the colossal river. With danger a constant companion - outwitting alligators, jaguars, pit vipers and electric eels, not to mention overcoming the hurdles of injuries and relentless tropical storms - Ed's journey demanded extreme physical and mental strength. Often warned by natives that he would die, Ed even found himself pursued by machete-wielding tribesmen and detained for murder. However, Ed's journey was an adventure with a purpose: to help raise people's awareness of environmental issues. Ed had unprecedented access to indigenous communities and witnessed the devastating effects of the deforestation of the Amazon rainforest first-hand. His story of disappearing tribes and loss of habitats concerns us all. Ultimately though, *Walking the Amazon* is an account of a world-first expedition that takes readers on the most daring journey along the world's greatest river and through the most bio-diverse habitat on earth.

The Incredible Journey of Plants Oct 31 2022 In this richly illustrated volume, a leading neurobiologist presents fascinating stories of plant migration that reveal unexpected connections between nature and culture. When we talk about migrations, we should study plants to understand that these phenomena are unstoppable. In the many different ways plants move, we can see the incessant action and drive to spread life that has led plants to colonize every possible environment on earth. The history of this relentless expansion is unknown to most people, but we can begin our exploration with these surprising tales, engagingly told by Stefano Mancuso. Generation after generation, using spores, seeds, or any other means available, plants move in the world to conquer new spaces. They release huge quantities of spores that can be transported thousands of miles. The number and variety of tools through which seeds spread is astonishing: we have seeds dispersed by wind, by rolling on the ground, by animals, by water, or by a simple fall from the plant, which can happen thanks to propulsive mechanisms, the swaying of the mother plant, the drying of the fruit, and much more. In this accessible, absorbing overview, Mancuso considers how plants convince animals to transport them around the world, and how some plants need particular animals to spread; how they have been able to grow in places so inaccessible and inhospitable as to remain isolated; how they resisted the atomic bomb and the Chernobyl disaster; how they are able to bring life to sterile islands; how they can travel through the ages, as they sail around the world.

The Incredible Human Journey Feb 08 2021 Alice Roberts has been travelling the world - from Ethiopian desert to Malay peninsula and from Russian steppes to Amazon basin - in order to understand the challenges that early humans faced as they tried to settle continents. On her travels she has witnessed some of the daunting and brutal challenges our ancestors had to face: mountains, deserts, oceans, changing climates, terrifying giant beasts and volcanoes. But she discovers that perhaps the most serious threat of all came from other humans. When our ancestors set out from Africa there were already two other species of human on the planet: Neanderthal in Europe and *Homo erectus* in Asia. Both (contrary to popular perception) were intelligent, adept at making tools and weapons and were long adapted to their environments. So, Alice asks, why did only *Homo sapiens* survive? Part detective story, part travelogue, and drawing on the latest genetic and archaeological discoveries, Alice examines how our ancestors evolved physically in response to these challenges, finding out how our colour, shape, size, diet, disease resistance and even athletic ability have been shaped by the range of environments that our ancestors had to survive. She also relates how astonishingly closely related we all are. As a lecturer in Anatomy at Bristol University, Alice Roberts is eminently qualified to write this book. As a talented artist, she is perfectly qualified to illustrate it, and dotted throughout this lively book are many of the sketches and photographs from her travels.

The Crossover People Mar 12 2021 A reliable historical account is a recitation of past truths and an important guide to living life in the present. A study of history enables future generations to avoid the pitfalls experienced by those who have lived before. This is a historical novel based in part on a true story about a Jewish family's quest to escape oppression in Ukraine in the early twentieth century. The story traces the virulent anti-Semitism against the Jewish people in Ukraine and their need to escape from the darkness of a tsarist autocracy. In the guise of offering more freedoms to a downtrodden people, the tsarist regime was overthrown in a revolution led by the Marxist dictatorship of Lenin and then Stalin. That dictatorship became even more oppressive than the heavy hand of the tsar. The Jewish family became separated from the father when he escaped to the United States with the intent of the family joining him within months. Then the Great War closed all the doors for escape, and for almost eight years, a mother and her three young children lived through the horrors of world war, revolution, civil war, and communist dictatorship behind what became known as the Iron Curtain. The story culminates in the escape and ultimate reunion of the family with the father in the land of the free, the United States of America.
