Evolve yourself is the primer to understanding the concept of Conscious Personal Evolution. In everyday language, author Rich Rahn explains how beliefs determine our experience; why we see only what we choose to notice; and why science and religion are in agreement. It also shows that the search for meaning is the search for self and how human consciousness evolves. In light of this new scientific evidence, Evolve yourself explores what philosophers and scientists have been wrestling with for decades - man's individual relationship with life, the universe and God. It explains what each of us needs to know in order to evolve emotionally, intellectually and spiritually. Evolve yourself introduces the reader in precise, definitive terms to what is being heralded as the next phase in human development, Conscious Personal Evolution.
