White Dwarfs Jul 04 2020 The recent meeting of the world's white dwarf specialists was held in Leicester, in July 1992, reporting on the wealth of astronomical data that has been made available from a new generation of space-based observatories and recent theoretical advances which are essential for interpretation of the results. Astronomers now have access to previously unavailable spectral ranges and dramatically improved sensitivity in those wavebands already explored. Results from the ROSAT all-sky survey, Hubble Space Telescope, Hopkins Ultraviolet Telescope and the Colorado Rocket-borne Spectrometer shed new light on the composition of white dwarfs and their evolution.

The 10X Rule Jul 28 2022 Achieve "Massive Action" results and accomplish your business dreams! While most people operate with only three degrees of action-no action, retreat, or normal action-if you're after big goals, you don't want to settle for the ordinary. To

reach the next level, you must understand the coveted 4th degree of action. This 4th degree, also known as the 10 X Rule, is that level of action that guarantees companies and individuals realize their goals and dreams. The 10 X Rule unveils the principle of "Massive Action," allowing you to blast through business clichés and risk-aversion while taking concrete steps to reach your dreams. It also demonstrates why people get stuck in the first three actions and how to move into making the 10X Rule a discipline. Find out exactly where to start, what to do, and how to follow up each action you take with more action to achieve Massive Action results. Learn the "Estimation of Effort" calculation to ensure you exceed your targets. Make the Fourth Degree a way of life and defy mediocrity. Discover the time management myth. Get the exact reasons why people fail and others succeed. Know the exact formula to solve problems. Extreme success is by definition outside the realm of normal action. Instead of behaving like everybody else and settling for average results, take Massive Action with The 10 X Rule, remove luck and chance from your business equation, and lock in massive success.

Presidential Addresses of the American Philosophical Association, 1901-1910 Oct 19 2021 Inaugurates an 11-volume set covering the century decade by decade and concluding with a collection of historical essays in 20th century American philosophy. Short biographical sketches and photographs are provided for the nine speakers (Frank Tilly served two years from 1900 to 1902). Probably the two most widely known names are John Dewey, writing about beliefs and realities, and William James writing about the energies of men. Others include James Edwin Creighton on the purposes of a philosophical association, Frederick James Eugene Woodbridge on the problems of metaphysics, George Thomas White Patrick on vacation, Harry Norman Gardiner on the problem of truth, and John Grier Hibben on the philosophical aspects of evolution. Supporting the addresses are a chronology of the Association, what university departments the presidents were in, and their birthplaces listed by state and country. The series celebrates the centennial of the Association. Annotation copyrighted by Book News, Inc., Portland, OR

Survivor May 14 2021 Tender Branson, the last surviving member of the Creedish death cult, has commandeered a Boeing 747, emptied of passengers, in order to tell his story to the plane's black box before it crashes. Brought up by the repressive cult and, like all Creedish younger sons, hired out as a domestic servant, Tender finds himself suddenly famous when his fellow cult members all commit suicide. As media messiah he ascends to the very top of the freak-show heap before finally and apocalyptically spiralling out of control.

SUMMARY - The 10X Rule: The Only Difference Between Success And Failure By Grant Cardone Dec 01 2022 * Our summary is short, simple and pragmatic. It allows you to have the essential ideas of a big book in less than 30 minutes. By reading this summary, you will learn how to see and do things big to achieve your dreams and reach your goals every time. You will also learn : why normal people fail; how not to waste your potential; how to increase your motivation tenfold; how to set effective goals; that success is a state of mind; how to dominate the competition. Grant Cardone has overcome many challenges, experienced failures, but has also achieved true financial and personal success, thanks to a simple rule: the 10 times rule. By applying it, you will save time and save yourself a lot of fruitless effort. You'll also discover that success is much less about circumstances than how you look at things. So the sooner you learn to look at things in a positive light, the sooner you will achieve success. *Buy now the summary of this book for the modest price of a cup of coffee!

Learning from Asian Philosophy Dec 09 2020 In an attempt to bridge the vast divide between classical Asian thought and contemporary Western philosophy, Joel J. Kupperman finds that the two traditions do not, by and large, supply different answers to the same questions. Rather, each tradition is searching for answers to their own set of questions--mapping out distinct philosophical investigations. In this groundbreaking book, Kupperman argues that the foundational Indian and Chinese texts include lines of thought that can enrich current philosophical practice, and in some cases provide uniquely sophisticated insights. Special attention is given to the ethical issues of formation and fluidity of self, the nature and possibilities of choice, the compartmentalization of life implicit in some ethical systems, the variations of ethical demands from person to person, and the nature of philosophy itself as a communicative activity. This study will provide a wealth of information for philosophers seeking a closer knowledge of Asian philosophy and general readers with an interest in Eastern thought.
