The Problem of Money Jan 01 2023 Based on long-term medical anthropological research in northern Ghana, the author analyses issues of health and healing, of gender, and of the control and use of money in a changing rural African setting. He describes the culture of medical pluralism, so typical for neo-colonial states, and people's choices of "traditional" (local) medicine (plants and sacrifices), Islamic medicine (charms and various written solutions) and "modern" therapy (biomedicine, in particular western pharmaceuticals). He concludes that the rural-urban divide is a fiction, that demarcations between these areas are frequently blurred, linked by a postcolonial, capitalist discourse of local markets, regional economies and national structures, which frequently emerge in local African settings but often originate in global and multinational markets.

Breaking Free From the Shadows Dec 28 2019 One man's search for light in the darkness, identity out of contradiction, purpose out of irrelevance, and a path out of the uncertainty God is mobilizing an army and Steve is all in. This army will consist of men who have intimate and personal experience with the weapons of the world and spiritual warfare. But something is off and holding him back. He spends a year praying, searching, and operating in faith that the Lord will, one day, reveal answers to his questions. That day has finally arrived. Joined and guided by Shepherd, Steve is thrust into an epic story of his past and his heritage. He learns how the connection between sin and soul ties were passed down from father to son, spanning four generations, as he experiences how his little story fits into the larger story. His quest leads him to a River which opens his eyes to the nature of his wilderness. Can his history of denial, betrayal, hatred, and rejection be used as a part of God's plan to break the chains of bondage holding men, like him, back? The fox maneuvers, the coyote strikes, and the wolf prowls, but the rooster still crows. The lost sheep will be found. It is possible for any man to break free from his shadows and find the River in the wilderness wasteland.

Africa's Natural Resources and Underdevelopment Sep 04 2020 This book explores how African countries can convert their natural resources, particularly oil and gas, into sustainable development assets. Using Ghana, one of the continent's newest oil-producing countries, as a lens, it examines the "resource curse" faced by other producers - such as Nigeria, Angola, and Equatorial Guinea - and demonstrates how mismanagement in those countries can provide valuable lessons for new oil producers in Africa and elsewhere. Relying

on a broad range of fieldwork and policymaking experience, Panford suggests practical measures for resource-rich developing countries to transform natural resources into valuable assets that can help create jobs, boost human resources, and improve living and working conditions in Ghana in particular. He suggests fiscal, legal, and environmental antidotes to resource mismanagement, which he identifies as the major obstacle to socioeconomic development in countries that have historically relied on natural resources.

Democracy as Human Rights Jul 27 2022 Is global democracy possible? The most prominent institutional manifestations of this concept-the UN, WTO, IMF and World Bank-have been skewered as cloistered anti-democratic institutions by anti-globalization activists. Meanwhile, proponents of globalization advocate reforming these institutions to make them more transparent. Michael Goodhart argues that both views fail to recognize the complex link between modern democracy and the sovereign state and the degree to which globalization challenges the modern conceptualization of democracy. Original and historically informed, Democracy as Human Rights provides a carefully argued theory of democracy in which traditional representative government is supported by global institutions designed to guarantee fundamental human rights.

Agricultural Commercialization, Gender Equality and the Right to Food Oct 30 2022 This volume explores agricultural commercialization from a gender equality and right to food perspective. Agricultural commercialization, involving not only the shift to selling crops and buying inputs but also the commodification of land and labour, has always been controversial. Strategies for commercialization have often reinforced and exacerbated inequalities, been blind to gender differences and given rise to violations of the human rights to food, land, work and social security. While there is a body of evidence to trace these developments globally, impacts vary considerably in local contexts. This book systematically considers these dynamics in two countries, Cambodia and Ghana. Profoundly different in terms of their history and location, they provide the basis for fruitful comparisons because they both transitioned to democracy in the early 1990s, made agricultural development a priority, and adopted orthodox policies of commercialization to develop the sector. Chapters illustrate how commercialization processes are gendered, highlighting distinctive gender, ethnic and class dynamics in rural Ghana and Cambodia and the different outcomes these generate. They also show the ways in which food cultures are changing and the often-problematic impact of these changes on the safety and quality of food. Specific policies and legal norms are

examined, with chapters addressing the development and implementation of frameworks on the right to food and land administration. Overall, the volume brings into relief multiple dimensions shaping the outcomes of processes of commercialization, including gender orders, food cultures, policy translation, national and sub-national policies, corporate investments and programmes, and formal and informal legal norms. In doing so, it offers insight not only on our case countries, but also provides proposals to advance rights-based research on food security. This book will be of great interest to students and scholars of food security, agricultural development and economics, gender, human rights and sustainable development.

The Trick to Money is Having Some Nov 30 2022 "Money making is not a serious business. It is a game that you play. At first it may seem that it is a game that you play with forces outside yourself--the economies of the market place so to speak--but as you proceed you discover it is actually a game you play with yourself."--Stuart Wilde. Stuart Wilde's money book, his fifth work, deals with the E.S.P. of easy money and the art of being in the right place at the right time, with the right idea and the right attitude. Like his other highly successful books, this work is full of useful information. His breezy and comical style make for effortless reading, as you plot your path to complete financial freedom.

What Works in Girls' Education May 01 2020 Hard-headed evidence on why the returns from investing in girls are so high that no nation or family can afford not to educate their girls. Gene Sperling, author of the seminal 2004 report published by the Council on Foreign Relations, and Rebecca Winthrop, director of the Center for Universal Education, have written this definitive book on the importance of girls' education. As Malala Yousafzai expresses in her foreword, the idea that any child could be denied an education due to poverty, custom, the law, or terrorist threats is just wrong and unimaginable. More than 1,000 studies have provided evidence that high-quality girls' education around the world leads to wide-ranging returns: Better outcomes in economic areas of growth and incomes Reduced rates of infant and maternal mortality Reduced rates of child marriage Reduced rates of the incidence of HIV/AIDS and malaria Increased agricultural productivity Increased resilience to natural disasters Women's empowerment What Works in Girls' Education is a compelling work for both concerned global citizens, and any academic, expert, nongovernmental organization (NGO) staff member, policymaker, or journalist seeking to dive into the evidence and policies on girls' education.

Constitutionalism and the Economy in Africa Nov 18 2021 Despite expectations that the celebrated second wave of constitutional democracy in

the 1990s would facilitate economic development, Africa remains the continent with the highest level of poverty in the world. The fight against poverty hinges on a vibrant economy that creates jobs and income by generating enough revenue to enable the state to take pro-development measures. However, instead of the economic benefits that were supposed to accrue from the constitutional reforms of the last three decades (including entrenching a market economy), African economies remain weak, a situation that has been aggravated by the COVID-19 pandemic. By focusing on the relationship between constitutionalism and economic growth in Africa, this volume addresses five questions: (1) In the constitutional reforms of the 1990s and thereafter, did constitutions also reflect the shift towards a market economy, and if so, in what manner? (2) Given that agriculture and extractive industries are the main sources of state revenue in many African economies, how are matters of land and other natural resources dealt with constitutionally? (3) Where the market economy is captured in a constitution, what is the state's relationship to that economy: interventionist or laissez-faire, or somewhere in between? Have constitutions also established a 'social' state that provides its citizens with the basic elements of a dignified life? (4) In the process of constitution-making and implementation concerning the economy, what impact has globalization had on constitutionalism and economic growth in Africa? (5) Finally, how has the relationship between constitutionalism and economic growth played out in practice? Is there a symbiotic relationship? Has constitutionalism led (or may do so) to greater economic prosperity? *Constitutionalism and the Economy in Africa* offers a range of comprehensive arguments and case studies that will be of interest and use to academics, post-graduate students, judges, lawyers, economists, and policy makers involved in the economic role of the State, the impact of globalization, and the constitutional foundations for land and natural resources exploitation.

How to Win the Lottery with the Law of Attraction Aug 23 2019 HOW TO WIN THE LOTTERY WITH THE LAW OF ATTRACTION was written by Law of Attraction lottery winner, teacher and author Eddie Coronado. Based on interviews with actual winners who have used the Law of Attraction to win lottery prizes, this book provides the metaphysical tools and insights that are necessary to win lottery and contest prizes through the creative power of thoughts and feelings. Although this book contains the manifestation techniques of people who have won money, these metaphysical exercises can be used to attract the perfect mate, a new career, financial success, or anything that you can make a part of your beliefs and feelings. There is no limit to how much money and success you can manifest through the Law of Attraction because this immense spiritual power does not have an opinion about what you should or should not have. You can use the Law of Attraction to manifest ten cents or ten million dollars. The determining factor is belief and expectancy, which can be harnessed by using the spiritual tools discussed in this book. THIS BOOK CONTAINS FOUR PARTS: PART 1: This section explores the tools that are used for the manifestation techniques in this book. The tools covered are as follows: Affirmations, Creative Visualization, Expectation, Gratitude, and the Practice of Receiving. You should take the time to carefully read this section even if you are familiar with the Law of Attraction and the power of intention. This section contains a number of insights and explanations that may have been missed by other authors and teachers. For example, the Practice of Receiving is a powerful tool that can help you attract a lot of money, yet many Law of Attraction books do not mention this important exercise. In addition, I have included some helpful information about gratitude and affirmations as it relates to manifesting money. Affirmations of words, thoughts, feelings, and actions are also covered. Finally, the most important element of any manifestation technique is creative visualization, which every Law of Attraction lottery and contest winner has used to win prizes. PART 2: This section includes the manifestation techniques used by the winners who were interviewed for this book. Each winner, including the author, is introduced and his/her manifestation exercise is documented to reflect the exact steps taken to win lottery prizes. No changes have been made in order to preserve the integrity of each winner's method. PART 3: This is a Question and Answer Section that covers the most important questions about the manifestation techniques in this book. The answers have been provided by the lottery winners who were interviewed. This Question and Answer section will provide clarity and direction for those readers who are committed to using the Law of Attraction to manifest

lottery prizes. The questions included in this section cover topics such as: Should I buy lots of tickets? How will I know that my intention will work? How long will it take for me to get results? What part does luck play in manifesting lottery prizes? In addition, a host of other important questions are discussed. PART 4: This section contains helpful tips and suggestions that will explain how to implement the following manifestation techniques and how to make the most of them. It also contains information regarding the common denominators of the winners' daily action plan in order to provide a clear understanding of the mental and emotional habits that are necessary for manifesting lottery prizes with the Law of Attraction.

The Art Collector in Early Modern Italy Dec 20 2021 Lorenzo Lotto's Portrait of Andrea Odoni is one of the most famous paintings of the Italian Renaissance. Son of an immigrant and a member of the non-noble citizen class, Odoni understood how the power of art could make a name for himself and his family in his adopted homeland. Far from emulating Venetian patricians, however, he set himself apart through the works he collected and the way he displayed them. In this book, Monika Schmitter imaginatively reconstructs Odoni's house - essentially a 'portrait' of Odoni through his surroundings and possessions. Schmitter's detailed analysis of Odoni's life and portrait reveals how sixteenth-century individuals drew on contemporary ideas about spirituality, history, and science to forge their own theories about the power of things and the agency of object. She shows how Lotto's painting served as a meta-commentary on the

practice of collecting and on the ability of material things to transform the self.

The Economy of Ghana Mar 11 2021 The book follows a first edition published in 1989, which focused on the severe economic crisis Ghana faced during the late 1970s and the early 1980s. In this second edition, the authors extend the review up to the mid-2010s, covering the entire period since independence, with a special focus on shifts in economic policy, starting with the adoption of the Economic Recovery Programme in 1983. Huq and Tribe provide systematic coverage of Ghanaian economic development since its independence, reviewing the two main modes of development that have been practiced; and offer an updated, rich data bank. By analyzing the wider macroeconomy of Ghana; its individual sectors; money, banking and trade; infrastructure and environmental policies; and Ghana's poverty, welfare and income distribution, the authors are able to draw vital lessons from the country's economic development.

Can't Hurt Me Oct 25 2019 New York Times Bestseller Over 2.5 million copies sold For David Goggins, childhood was a nightmare - poverty, prejudice, and physical abuse colored his days and haunted his nights. But through self-discipline, mental toughness, and hard work, Goggins transformed himself from a depressed, overweight young man with no future into a U.S. Armed Forces icon and one of the world's top endurance athletes. The only man in history to complete elite training as a Navy SEAL, Army Ranger, and Air Force Tactical Air Controller, he went on to set records in numerous endurance events, inspiring Outside magazine to name him The Fittest (Real) Man in America. In this curse-word-free edition of Can't Hurt Me, he shares his astonishing life story and reveals that most of us tap into only 40% of our capabilities. Goggins calls this The 40% Rule, and his story illuminates a path that anyone can follow to push past pain, demolish fear, and reach their full potential.

The Data Science Design Manual May 13 2021 This engaging and clearly written textbook/reference provides a must-have introduction to the rapidly emerging interdisciplinary field of data science. It focuses on the principles fundamental to becoming a good data scientist and the key skills needed to build systems for collecting, analyzing, and interpreting data. The Data Science Design Manual is a source of practical insights that highlights what really matters in analyzing data, and provides an intuitive understanding of how these core concepts can be used. The book does not emphasize any particular programming language or suite of data-analysis tools, focusing instead on high-level discussion of important design principles. This easy-to-read text ideally serves the needs of undergraduate and early graduate students embarking on an "Introduction to Data Science" course. It reveals how this discipline sits at the intersection of statistics, computer science, and machine learning, with a distinct heft and character of its own. Practitioners in these and related fields will find this book perfect for self-study as well. Additional learning tools: Contains "War Stories," offering perspectives on how data science applies in

the real world Includes "Homework Problems," providing a wide range of exercises and projects for self-study Provides a complete set of lecture slides and online video lectures at www.data-manual.com Provides "Take-Home Lessons," emphasizing the big-picture concepts to learn from each chapter Recommends exciting "Kaggle Challenges" from the online platform Kaggle Highlights "False Starts," revealing the subtle reasons why certain approaches fail Offers examples taken from the data science television show "The Quant Shop" (www.quant-shop.com)

Taxation in Ghana: a Fiscal Policy Tool for Development Jul 15 2021 The first edition of this book-Taxation in Ghana: A Fiscal Policy Tool for Development- is the product of considerable tax research from 1943 to 2018, spanning a period of 75 years and grounded in knowledge and concepts; as well as, applications through an extended period of tax practice, teaching and learning; combined with international exposure. A lot of insights have been illuminated based on lessons learned and drawn from other countries, including the United States of America to enrich the contents. Against the backdrop of the dynamic nature of taxation and fiscal policy. Most of the existing taxation books in Ghana focused on tax practice. So, the purpose of this book is to bridge the taxation scholarship gap. In addition to traditionally-treated topics in most taxation books in Ghana, the novelty in this book is the inclusion of important topics on tax planning, tax reforms, and tax administration, and many more. As a result, specific recommendations have been proffered for the consideration of policy makers in developing countries. References and Acts of Parliament; supported by appendices have been provided for further studies on the subject. A true story of the first major oil discovery in Ghana by Mr. George Yaw Owusu with M. Rutledge McCall published 2017 in the United States of America: In Pursuit of JUBILEE was used to enrich the discussion on petroleum (Oil and Gas) in Chapter 48 of this textbook. Additionally, Apostle Professor Opoku Onyinah of the Church of Pentecost has been presented for his phenomenal transformational leadership in Africa in Chapter 66. The book has been designed for: (1) Individual study, (2) Group study, (3) Lecture material, (4) Policy Manual, and (5) library or reference.

Global Corruption Report: Sport Nov 06 2020 Sport is a global phenomenon engaging billions of people and generating annual revenues of more than US\$ 145 billion. Problems in the governance of sports organisations, fixing of matches and staging of major sporting events have spurred action on many fronts. Yet attempts to stop corruption in sport are still at an early stage. The Global Corruption Report (GCR) on sport is the most comprehensive analysis of sports corruption to date. It consists of more than 60 contributions from leading experts in the fields of corruption and sport, from sports organisations, governments, multilateral institutions, sponsors, athletes, supporters, academia and the wider anti-corruption movement. This GCR provides essential analysis for understanding the corruption risks in sport, focusing on sports governance, the business of sport, planning of major events, and match-

fixing. It highlights the significant work that has already been done and presents new approaches to strengthening integrity in sport. In addition to measuring transparency and accountability, the GCR gives priority to participation, from sponsors to athletes to supporters an essential to restoring trust in sport.

Protecting Information Jun 25 2022 For many everyday transmissions, it is essential to protect digital information from noise or eavesdropping. This undergraduate introduction to error correction and cryptography is unique in devoting several chapters to quantum cryptography and quantum computing, thus providing a context in which ideas from mathematics and physics meet. By covering such topics as Shor's quantum factoring algorithm, this text informs the reader about current thinking in quantum information theory and encourages an appreciation of the connections between mathematics and science. Of particular interest are the potential impacts of quantum physics: (i) a quantum computer, if built, could crack our currently used public-key cryptosystems; and (ii) quantum cryptography promises to provide an alternative to these cryptosystems, basing its security on the laws of nature rather than on computational complexity. No prior knowledge of quantum mechanics is assumed, but students should have a basic knowledge of

complex numbers, vectors, and matrices.
