Computer Security - ESORICS 2017
Oct 26 2019 The two-volume set, LNCS 10492 and LNCS 10493 constitutes the refereed proceedings of the 22nd European Symposium on Research in Computer Security, ESORICS 2017, held in Oslo, Norway, in September 2017. The 54 revised full papers presented were carefully reviewed and selected from 338 submissions. The papers address issues such as data protection; security protocols; systems; web and network security; privacy; threat modeling and detection; information flow;

and security in emerging applications such as cryptocurrencies, the Internet of Things and automotive.
Bandit Algorithms
Oct 19 2021 A comprehensive and rigorous introduction for graduate students and researchers, with applications in sequential decision-making problems.

Landscapes and Landforms of England and Wales
Sep 05 2020 This book presents the geomorphological diversity of England and Wales. These regions are characterised by an extraordinary range of landforms and landscapes, reflecting both the occurrence of many different rock types and drastic climatic changes over the last few million years, including ice sheet expansion and decay. The book begins by providing the

geological and geomorphological context needed in order to understand this diversity in a relatively small area. In turn, it presents nearly thirty case studies on specific landscapes and landforms, all of which are landmarks in the territory discussed. These include the famous coastal cliffs and landslides, granite tors of Dartmoor, formerly glaciated mountains of Snowdonia and the Lake District, karst of Yorkshire, and many others. The geomorphology of London and the Thames is also included. Providing a unique reference guide to the geomorphology of England and Wales,

the book is lavishly illustrated with diagrams, colour maps and photos, and written in an easy-to-read style. The contributing authors are distinguished geomorphologists with extensive experience in research, writing and communicating science to the public. The book will not only be of interest to geoscientists, but will also benefit specialists in landscape research, geoconservation, tourism and environmental protection.

The Human Division Dec 21 2021

Hard-core science fiction at its very best, John Scalzi's *The Human Division* is the fifth in *The Old Man's War* series.

Lieutenant Harry Wilson has an impossible mission. He must help preserve the union of humanity's colonies, in the wake of a terrible revelation. For years the Colonial Union has protected its citizens from the dangerous universe around them. But the people of Earth now know the ugly truth. The Union deliberately kept Earth as an ignorant backwater

- and as a source of recruits for its war against hostile aliens. Now, other alien races have formed a new alliance against the Union. And they've invited the incensed people of Earth to join them. Managing the Colonial Union's survival will take all the political cunning and finesse its diplomats can

muster. And Harry and his team will be deployed to deal with the unexpected - for failure is unthinkable. Continue the gripping space war series with The End of All Things. **Readings on Statutes, chiefly those affecting the administration of**
