***work to include essential exercises (with answer keys) to help novice writers gain command of stylistic structures and devices through guided practice, and to guide more experienced writers through the nuances of commanding style. Essential for today's writers, Strunk's original chapters regarding rules of usage and principles of composition are represented in this workbook. These original lessons, along with style exercises that teach writers to flex their writing style at will, include sentence writing, paragraph writing, and style writing exercises that amplify the impact of the original work by William Strunk, Jr. True to Strunk's original masterpiece, this Elements of Style Workbook addresses the most common and useful issues novice writers face, which are the same ones plaguing English writers for over a century. We honor Strunk's identification of these main writing challenges, and do not dilute the prominence of these points with either less difficult or more advanced grammatical lessons. In this way, we retain Strunk's original focus on the essentials. We have reproduced these essential lessons here and provided targeted practice to enable writers to strengthen those skills. While holding true to the original Elements of Style , this workbook also amplifies some troublesome yet vital stylistic points of practice with the following augmentations: -Grammar on past perfect -Expansive style section based on Noah Webster's style types -Extensive practice with the multitude of styles Webster delineates, using excerpts from literature masters as examples and guides None of these highly useful components were present in the original Elements of Style, nor have they been represented in any edition since then. Style Types The style section draws from Noah Webster's articulate delineations of style types. Each style type draws from a master of literature illustrating that particular style, then challenges writers to imitate, recreate, and alter styles at will. The following style types, identified by Webster, are included in this workbook: 1. Forceful 2. Vehement 3. Elegant 4. Brief 5. Copious or diffusive 6. Precise 7. Neat 8. Loose 9. Feeble 10. Plain Together, these style types represent the vast majority of writing styles used by literary masters in the English language. ***sequential books in the Grammar for the Well-Trained Mind series, providing detailed, well-designed exercises in the correct use of English grammar. The Key, along with the accompanying Yellow Workbook and the Core Instructor Text, make up Grammar for the Well-Trained Mind: a complete course that takes students from basic definitions (“A noun is the name of a person, place, thing, or idea”) through advanced sentence structure and analysis, all the grammar skills needed to write and speak with eloquence and confidence. This innovative program combines the three essential elements of language learning: understanding and memorizing rules (prescriptive teaching), repeated exposure to examples of how those rules are used (descriptive instruction), and practice using those rules in exercises and in writing (practical experience). Each year, parents and teachers go through the dialogue, rules, and examples in the Core Instructor Text; students follow along in the Workbook. This repetition solidifies the concepts, definitions, and examples in the student’s mind. There are four Workbooks, one for each year. Each Workbook contains the same rules and examples, but four completely different sets of exercises and assignments, allowing students to develop a wide-ranging knowledge of how the rules and examples are put to use in writing. Each Key to the Workbooks provides not only answers, but also explanations for the parent/instructor, and guidance as to when the answers might be ambiguous (as, in English, they often are). All of the rules covered, along with the repeated examples for each, are assembled for ongoing reference in The Grammar Guidebook. Every step of the sentence diagramming process is gathered for reference, along with illustrations, in The Diagramming Dictionary. These will become the student’s indispensable guide to writing through high school, into college and beyond. Step-by-step instruction takes students from the most basic concepts through advanced grammatical concepts such as modal and hortative verbs and multiple functions of noun clauses. Extensive diagramming exercises reinforce the rules and help technical and visual learners to understand and use the English language effectively. Each step of the diagramming process is illustrated and thoroughly explained to the student. Answers almost nine hundred questions frequently asked by new writers, arranged by subject for quick reference Help students appreciate texts and write about them with conviction. Responding to a comprehension question is a surprisingly complex task. It draws on multiple skills: students must be able to read and analyze a text passage; consider what aspect of the text the question addresses; and then quickly and concisely write about their ideas, citing evidence to support them. Hence the prominence of constructed-response questions in standardized testing. In this refreshingly clear and upbeat guide, literacy consultant Nancy Boyles gives a step-by-step demonstration of how to help students achieve success with this task—and in the process of unpacking the steps involved, demonstrates how the instruction can inspire teachers' creativity as well as deepen students' literacy skills. Filled with ready-to-use scaffolds for every stage of instruction—sets of sample questions, anchor charts, cue cards, answer frames—this is a one-stop resource for teaching students how to organize their thoughts about what they've read, and then set them down in writing.
