**Resolana** Jan 22 2022 Villagers in northern New Mexico refer to the south-facing side of a wall as la resolana, meaning the place where the sun shines. Every culture has a resolana, a place where the resolaneros—the villagers—gather, dialogue, and reflect on society, culture, and politics. The buried knowledge that emerges from this process may be pure gold, or el oro del barrio, a metaphor for the culturally contextualized knowledge gathered at the resolana. Coming from diverse backgrounds in social work, sociology, public administration, literature, history, and education, three modern resolaneros take the twin concepts of resolana and el oro del barrio on a breathtaking journey from their rural roots to their application in an urban setting and on to a holistic view of globalization. The authors offer a humane perspective on transborder cultures and all communities struggling to maintain their cultural and linguistic identities. They share an optimistic view of how ordinary people everywhere can take back control of their own destinies. This book is about uncovering subjugated knowledge—el oro del barrio—through resolana, a dynamic process of thought and action. Resolana will inspire dialogue and creativity from those interested in sociology, political science, social work, and Chicano studies, as well as public-policy makers and the general public.

**Mass Communication and Journalism** Feb 20 2022 The study of mass communication is often associated with the practical applications of journalism (Print media), television and radio broadcasting, film, public relations, or advertising. With the diversification of media options, the study of communication has extended to include social media and new media, which have stronger feedback models than traditional media sources. While the field of mass communication is continually evolving, the following four fields are generally considered the major areas of study within mass communication. They exist in different forms and configurations at different schools or universities, but are (in some form) practiced at most institutions that study mass communication. Advertising, in relation to mass communication, refers to marketing a product or service in a persuasive manner that encourages the audience to buy the product or use the service. The presented book has been written in view of tremendous changes being marked in almost each and every spheres of life in 21st century and the role of media has also made a significant change. Its changing role and its perception are being deliberately marked. The book carries out comprehensive analysis of above mentioned facts.

**The Brevard Rosenwald School** Jan 10 2021 A century ago, the Brevard Rosenwald School in Transylvania County, North Carolina, opened its doors to African American students from the community and the surrounding area. It was a microcosm of the community it served; teachers and pupils lived on the same streets, shopped in the same stores, worshiped at the same churches, and teachers and parents served on the same committees, confronted similar social and economic problems, and sought each other's advice about issues in daily life. This book is a history of the school, with special attention given to the years 1920 to 1966, and its attempts to improve the education of African Americans in the South. It also focuses on the school's beginnings, development, significance to the community, closing, and the integration process and the Rosenwald community today. The author also presents narratives from former students about their experiences and educational goals, pursuits and accomplishments at the school and later in their lives.

Using her personal stories, *Twin Expectations* provides direction to parents to help their children of all ages: • gain the confidence to make wise choices; • learn to have accountability in all things; • understand the power of purpose; • be resilient; • mind their manners; • become independent sooner; and • value family.
