Philosophy Between the Lines Jul 04 2020 "Philosophical esotericism--the practice of communicating one's unorthodox thoughts 'between the lines'--was a common practice until the end of the eighteenth century. The famous Encyclopédie of Diderot, for instance, not only discusses this practice in over twenty different articles, but admits to employing it itself. The history of Western thought contains hundreds of such statements by major philosophers testifying to the use of esoteric writing in their own work or others'. Despite this long and well-documented history, however, esotericism is often dismissed today as a rare occurrence. But by ignoring esotericism, we risk cutting ourselves off from a full understanding of Western philosophical thought ... Philosophy Between the Lines is the first comprehensive, book-length study of the history and theoretical basis of philosophical esotericism, and it provides a crucial guide to how many major writings--philosophical, but also theological, political, and literary--were composed prior to the nineteenth century."--Publisher's Web site.

Cibola Burn Sep 05 2020 The fourth book in the NYT bestselling Expanse series, Cibola Burn sees the crew of the Rocinante on a new frontier, as the rush to colonize the new planets threatens to outrun law and order and give way to war and chaos. Now a Prime Original series. HUGO AWARD WINNER FOR BEST SERIES Enter a new frontier. "An empty apartment, a missing family, that's creepy. But this is like finding a military base with no one on it. Fighters and tanks idling on the runway with no drivers. This is bad juju. Something wrong happened here. What you should do is tell everyone to leave." The gates have opened the way to a thousand new worlds and the rush to colonize has begun. Settlers looking for a new life stream out from humanity's home planets. Ilus, the first human colony on this vast new frontier, is being born in blood and fire. Independent settlers stand against the overwhelming power of a corporate colony ship with only their determination, courage, and the skills learned in the long wars of home. Innocent scientists are slaughtered as they try to survey a new and alien world. The struggle on Ilus threatens to spread all the way back to Earth. James Holden and the crew of his one small ship are sent to make peace in the midst of war and sense in the midst of chaos. But the more he looks at it, the more Holden thinks the mission was meant to fail. And the whispers of a dead man remind him that the great galactic civilization that once stood on this land is gone. And that something killed it. The Appendix - ECAB - E-Book Jan 02 2023 The appendix has historically been considered to be a vestigial organ without any known function. However, it often becomes inflamed, and appendicitis is a common cause of acute and chronic abdominal pain with appendectomy being one of the commonest operations performed by general surgeons. Like the tonsils, uterus, and gall bladder, it also carries the

distinction of being an organ which is often removed for dubious indications. This tendency has been exacerbated by the widespread practice and popularity of laparoscopic surgery. The majority of this book naturally focuses on the problem of appendicitis and the various issues in its management. Many of the authors have also brought in their substantial personal experience which, though not necessarily based on scientific studies, is valuable in a given clinical situation. The two chapters on appendicular tumors come from experts who are considered leaders in this field and their message is that these tumors can be treated effectively if diagnosed early and managed appropriately. This issue has contributions from a wide variety of specialists including gastro surgeons, colorectal surgeons, surgical oncologists, laparoscopic surgeons, pediatric surgeons, and pathologists. The collection not only highlights what is a relatively ignored topic but also sounds a cautionary note against trivialization of appendicular disease and appendectomy.

CURRENT Diagnosis and Treatment Surgery: Thirteenth Edition Jan 10 2021 To-the-point information on more than 1000 diseases and disorders surgeons are most likely to encounter The leading single-source surgery book for house-staff, students, practitioners, and surgeons A Doody's Core Title for 2011! "This is an excellent source of updated, authoritative, and concise information on diseases encountered in general surgery and the surgical subspecialties of otolaryngology, urology, gynecology, orthopedics, plastic and reconstructive surgery, and pediatrics....This is a wonderful resource for all levels of surgical practitioners as well as nonsurgical practitioners. In my experience, it has provided me with a framework to prepare for both oral and written boards. 3 Stars."--Doody's Review Service Authoritative, concise, and completely up-to-date, CURRENT Diagnosis & Treatment Surgery features: Wide-ranging coverage that encompasses general surgery and all the important subspecialties including otolaryngology, urology, gynecology, orthopedics, plastic and reconstructive surgery, and pediatrics References linked to recent journal articles Logical quick-find organization made even more accessible by a comprehensive index More than 600 informative photographs and illustrations Detailed treatment algorithms NEW CD-ROM with content from Quick Answers: Surgery to speed diagnosis of symptoms and signs NEW Chapter on Training, Communication, Professionalism, and Systems-Based Practice Completely rewritten chapters on Wound Healing, Anesthesia, Otolaryngology/Head & Neck Surgery, The Heart, Neurosurgery, Gynecology, and Orthopedics

Taking Rights Seriously Aug 05 2020 A landmark work of political and legal philosophy, Ronald Dworkin's Taking Rights Seriously was acclaimed as a major work on its first publication in 1977 and remains profoundly influential in the 21st century. A forceful statement of liberal principles - championing the legal, moral and political rights of the individual against the state - Dworkin demolishes prevailing utilitarian and legal-positivist approaches to jurisprudence. Developing his own theory of adjudication, he applies this to controversial public issues, from civil disobedience to positive discrimination. Elegantly written and cuttingly insightful, Taking Rights Seriously is one of the most important works of public thought of the last fifty years.

Computing the Future Dec 21 2021 Computers are increasingly the enabling devices of the information revolution, and computing is becoming ubiquitous in every corner of society, from manufacturing to telecommunications to pharmaceuticals to entertainment. Even more importantly, the face of computing is changing rapidly, as even traditional rivals such as IBM and Apple Computer begin to cooperate and new modes of computing are developed. Computing the Future presents a timely assessment of academic computer science and engineering (CS&E), examining what should be done to ensure continuing progress in making discoveries that will carry computing into the twenty-first century. Most importantly, it advocates a broader research and educational agenda that builds on the field's impressive accomplishments. The volume outlines a framework of priorities for CS&E, along with detailed recommendations for education, funding, and leadership. A core research agenda is outlined for these areas: processors and multiple-processor systems, data communications and networking, software engineering, information storage and retrieval, reliability, and user interfaces. This highly readable volume examines: Computer science and engineering as a discipline-how computer scientists and engineers are pushing back the frontiers of their field. How CS&E must change to meet the challenges of the future. The influence of strategic investment by federal agencies in CS&E research. Recent structural changes that affect the interaction of academic CS&E and the business environment. Specific examples of interdisciplinary and applications research in four areas: earth sciences and the environment, computational biology, commercial computing, and the long-term goal of a national electronic library. The volume provides a detailed look at undergraduate CS&E education, highlighting the limitations of four-

year programs, and discusses the emerging importance of a master's degree in CS&E and the prospects for broadening the scope of the Ph.D. It also includes a brief look at continuing education.

Amusing Ourselves to Death Aug 17 2021 What happens when media and politics become forms of entertainment? As our world begins to look more and more like Orwell's 1984, Neil's Postman's essential guide to the modern media is more relevant than ever. "It's unlikely that Trump has ever read Amusing Ourselves to Death, but his ascent would not have surprised Postman." -CNN Originally published in 1985, Neil Postman's groundbreaking polemic about the corrosive effects of television on our politics and public discourse has been hailed as a twenty-first-century book published in the twentieth century. Now, with television joined by more sophisticated electronic media—from the Internet to cell phones to DVDs—it has taken on even greater significance. Amusing Ourselves to Death is a prophetic look at what happens when politics, journalism, education, and even religion become subject to the demands of entertainment. It is also a blueprint for regaining control of our media, so that they can serve our highest goals. "A brilliant, powerful, and important book. This is an indictment that Postman has laid down and, so far as I can see, an irrefutable one." —Jonathan Yardley, The Washington Post Book World

Advancing the Federal Research Agenda on Violence Against Women Jun 26 2022 This report expands on the work of an earlier National Research Council panel whose report, Understanding Violence Against Women, was published in 1996. The report is based on the presentations and deliberations of a workshop convened in January 2002, at the request of Congress, to develop a detailed research agenda on violence against women. While some of the research recommendations in the earlier report have been funded and carried out, the workshop demonstrated that important gaps remain. For example, prevalence and incidence data are still inadequate to measure trends or to reveal whether interventions being designed under federal programs are, in fact, working. Among its primary recommendations, the committee underscored the importance of strengthening the data and research infrastructure in this area, especially the need for better prevalence data and longitudinal data to determine the causes of violent victimization of women and the impact of interventions.

The Enlightenment and Religion Oct 26 2019 This publication offers a critical survey of religious change and its causes in 18th-century Europe. Focusing on Enlightenment Italy, France and England, the text illustrates how the canonical view of 18th-century religious change has in reality been constructed upon scant evidence and assumption

Common Airport Pavement Maintenance Practices Jun 14 2021 TRB's Airport Cooperative Research Program (ACRP) Synthesis 22: Common Airport Pavement Maintenance Practices explores how airports implement a pavement maintenance management program, including inspecting and tracking pavement condition, scheduling maintenance, identifying necessary funds, and treating distresses in asphalt and concrete pavements.

A First Course in Combinatorial Optimization Mar 12 2021 A First Course in Combinatorial Optimization is a text for a one-semester introductory graduate-level course for students of operations research, mathematics, and computer science. It is a self-contained treatment of the subject, requiring only some mathematical maturity. Topics include: linear and integer programming, polytopes, matroids and matroid optimization, shortest paths, and network flows. Central to the exposition is the polyhedral viewpoint, which is the key principle underlying the successful integer-programming approach to combinatorial-optimization problems. Another key unifying topic is matroids. The author does not dwell on data structures and implementation details, preferring to focus on the key mathematical ideas that lead to useful models and algorithms. Problems and exercises are included throughout as well as references for further study.

Witchcraft Narratives in Germany May 14 2021 Looks at why witch-trials failed to gain momentum and escalate into 'witch-crazes' in certain parts of early modern Europe. Examines the rich legal records of the German city of Rothenburg ob der Tauber, a city which experienced a very restrained pattern of witch-trials and just one execution for witchcraft between 1561 and 1652. Explores the social and psychological conflicts that lay behind the making of accusations and confessions of witchcraft. Offers insights into other areas of early modern life, such as experiences of and beliefs about communal conflict, magic, motherhood, childhood and illness. Offers a critique of existing explanations for the gender bias of witch-

trials, and a new explanation as to why most witches were women.

Electrical Engineering: Know It All Jan 22 2022 The Newnes Know It All Series takes the best of what our authors have written to create hard-working desk references that will be an engineer's first port of call for key information, design techniques and rules of thumb. Guaranteed not to gather dust on a shelf!

Electrical engineers need to master a wide area of topics to excel. The Electrical Engineering Know It All covers every angle including Real-World Signals and Systems, Electromagnetics, and Power systems. A 360-degree view from our best-selling authors Topics include digital, analog, and power electronics, and electric circuits The ultimate hard-working desk reference; all the essential information, techniques and tricks of the trade in one volume

Significant Findings from Full-scale Accelerated Pavement Testing Aug 29 2022 "TRB's National Cooperative Highway Research Program (NCHRP) Synthesis 433: Significant Findings from Full-Scale Accelerated Pavement Testing documents and summarizes significant findings from the various experimental activities associated with full-scale accelerated pavement testing (f-sAPT) programs that have taken place between 2000 and 2011. The report also identifies gaps in knowledge related to f-sAPT and where future research may be needed. NCHRP Synthesis 433 is designed to expand the f-sAPT base of knowledge documented in NCHRP Syntheses 325 and 235, both with the same title of Significant Findings from Full-Scale Accelerated Pavement Testing. f-sAPT is the controlled application of a wheel loading, at or above the appropriate legal load limit, to a pavement system to determine pavement response in a compressed time period. The acceleration of damage is achieved by one or more of the following factors: increased repetitions, modified loading conditions, imposed climatic conditions, and thinner pavements with a decreased structural capacity which have shorter design lives"--

News Hole Jan 28 2020 Explores how the decline in local political reporting has depressed citizen engagement with local politics in the US.

Let's Talk About When You Have to Have Your Appendix Out Apr 24 2022 Discusses appendicitis, explaining the function of the appendix, why it is sometimes necessary to remove it, and the recovery process.

Redesigning Continuing Education in the Health Professions Jul 16 2021 Today in the United States, the professional health workforce is not consistently prepared to provide high quality health care and assure patient safety, even as the nation spends more per capita on health care than any other country. The absence of a comprehensive and well-integrated system of continuing education (CE) in the health professions is an important contributing factor to knowledge and performance deficiencies at the individual and system levels. To be most effective, health professionals at every stage of their careers must continue learning about advances in research and treatment in their fields (and related fields) in order to obtain and maintain up-to-date knowledge and skills in caring for their patients. Many health professionals regularly undertake a variety of efforts to stay up to date, but on a larger scale, the nation's approach to CE for health professionals fails to support the professions in their efforts to achieve and maintain proficiency. Redesigning Continuing Education in the Health Professions illustrates a vision for a better system through a comprehensive approach of continuing professional development, and posits a framework upon which to develop a new, more effective system. The book also offers principles to guide the creation of a national continuing education institute.

Cognitive Pearls in General Surgery Dec 01 2022 This text is organized by organ system and the illustrations highlight surgical pearls borne of experience and polished by the study of pertinent references. Hand-drawn and illustrated figures show exact anatomical relationships as we see them in-vivo. A question/answer format augments the images to allow the reader to actively reflect on the topic and to appraise his/her knowledge in that area. The discussion sections strive to explain not only what the correct answer is, but also why the distractors are wrong, in order to motivate discussion and self-reflection. Cognitive Pearls in General Surgery details the explicit thought processes and associations that underlie the understanding of the topics at hand, with the intent of enhancing the fun and enjoyment that only an informed and well-grounded practice of surgery can provide.

An Analysis of Marijuana Policy Jun 02 2020 Defenders of marijuana use may seize on the ambiguity or absence of evidence for such damage and ignore any other effects on education or safety; those opposed to marijuana use may emphasize the possibility of chronic disease that is suggested by some laboratory

findings and ignore the social, political, and economic costs of fighting a well-established custom. The Committee wishes to make clear what it regards as the limits of this report for the selection of policy alternatives. Scientific judgment can estimate the prevalence of different kinds of use, risks to health, economic costs, and the like under current policies and can try to project such estimates for new policies. It can come to some conclusions based on those estimates. But selection of an alternative is always a value-governed choice, which can ultimately be made only by the political process.

Handbook of Recycling Aug 24 2019 Winner of the International Solid Waste Association's 2014 Publication Award, Handbook of Recycling is an authoritative review of the current state-of-the-art of recycling, reuse and reclamation processes commonly implemented today and how they interact with one another. The book addresses several material flows, including iron, steel, aluminum and other metals, pulp and paper, plastics, glass, construction materials, industrial by-products, and more. It also details various recycling technologies as well as recovery and collection techniques. To completely round out the picture of recycling, the book considers policy and economic implications, including the impact of recycling on energy use, sustainable development, and the environment. With contemporary recycling literature scattered across disparate, unconnected articles, this book is a crucial aid to students and researchers in a range of disciplines, from materials and environmental science to public policy studies. Portrays recent and emerging technologies in metal recycling, by-product utilization and management of post-consumer waste Uses life cycle analysis to show how to reclaim valuable resources from mineral and metallurgical wastes Uses examples from current professional and industrial practice, with policy and economic implications

Building Natural Language Generation Systems Oct 19 2021 This book explains how to build Natural Language Generation (NLG) systems - computer software systems which use techniques from artificial intelligence and computational linguistics to automatically generate understandable texts in English or other human languages, either in isolation or as part of multimedia documents, Web pages, and speech output systems. Typically starting from some non-linguistic representation of information as input, NLG systems use knowledge about language and the application domain to automatically produce documents, reports, explanations, help messages, and other kinds of texts. The book covers the algorithms and representations needed to perform the core tasks of document planning, microplanning, and surface realization, using a case study to show how these components fit together. It also discusses engineering issues such as system architecture, requirements analysis, and the integration of text generation into multimedia and speech output systems.

Current Issues in the Diagnostics and Treatment of Acute Appendicitis May 26 2022 The book Current Issues in the Diagnostics and Treatment of Acute Appendicitis is devoted to the actual and in some cases controversial and unresolved problems associated with acute appendicitis, as well as peculiarities of its clinical picture, diagnosis, and treatment in children. The materials of the book will be of interest to anyone who considers emergency abdominal surgery their specialty.

Making Young Voters Feb 20 2022 The solution to youth voter turnout requires focus on helping young people follow through on their political interests and intentions.

CURRENT Procedures Surgery Feb 29 2020 Learn to perform more than 50 of the most common surgical procedures with this step-by-step, superbly illustrated guide! CURRENT Procedures Surgery is a unique combination atlas and text that details everything that you must know to perform more than 50 key surgical procedures. It covers the full spectrum of general surgery in an ultra-convenient, at-a-glance format, with more than 400 beautifully rendered illustrations to guide you every step of the way. An easy to follow template for each procedure includes: Indications, Contraindications, Informed Consent, Equipment, Patient Preparation, Patient Positioning, Procedure, Postoperative Care, Potential Complications, Pearls and Tips, References. Features: More than 400 illustrations created specifically for this book along with clear, concise text show you how to perform essential surgical procedures Coverage includes procedures for the breast, gastrointestinal tract, diaphragm, pancreas, liver, thyroid, parathyroid, adrenal, arteries and veins, and more Templated presentation facilitates rapid review Author's pearls and tips included for each procedure A must-have resource for anyone starting their surgical residency

The End Of Alice May 02 2020 From the 2013 Orange Prize-winning author of May We Be Forgiven. Only a work of such searing, meticulously controlled brilliance could provoke such a wide range of visceral responses. Here is the incredible story of an imprisoned pedophile who is drawn into an erotically charged correspondence with a nineteen-year-old suburban coed. As the two reveal—and revel in—their

obsessive desires, Homes creates in The End of Alice a novel that is part romance, part horror story, at once unnerving and seductive.

Pronouncing Shakespeare Feb 08 2021 How did Shakespeare's plays sound when they were originally performed? How can we know, and could the original pronunciation ever be recreated? David Crystal recounts and reflects on Shakespeare's Globe's experiment with original pronunciation.

The Baker's Appendix Nov 27 2019 The ultimate quick, yet thorough, reference for bakers, with every metric conversion and ingredient substitution you could want, plus 18 recipes for basic, fail-proof cakes, frostings, and cookies—with variations that combine to make dozens of desserts. Bakers will wonder how they ever lived without this indispensable resource, featuring:

- Cups-to-grams conversions for ingredients*
- Basic recipes for cakes, quick breads, cookies, frostings, and more, with dozens of variations*
- Ingredient substitutions*
- DIY extracts, natural food colorings, sprinkles, and more*
- Decorating tips for cakes and cookies*
- Conversions for oven temperatures*
- Adjustments for baking at high altitudes*
- Volume charts for baking pans of all sizes*

Proceedings of a Workshop on Statistics on Networks (CD-ROM) Jul 28 2022 A large number of biological, physical, and social systems contain complex networks. Knowledge about how these networks operate is critical for advancing a more general understanding of network behavior. To this end, each of these disciplines has created different kinds of statistical theory for inference on network data. To help stimulate further progress in the field of statistical inference on network data, the NRC sponsored a workshop that brought together researchers who are dealing with network data in different contexts. This book - which is available on CD only - contains the text of the 18 workshop presentations. The presentations focused on five major areas of research: network models, dynamic networks, data and measurement on networks, robustness and fragility of networks, and visualization and scalability of networks.

Handbook for Evaluating Emissions and Costs of APUs and Alternative Systems Sep 25 2019 TRB's Airport Cooperative Research Program (ACRP) Report 64: Handbook for Evaluating Emissions and Costs of APUs and Alternative Systems is designed to help airports evaluate alternatives to aircraft auxiliary power units (APUs).

A Guide to Coursework in Psychology Nov 07 2020 Ever had difficulty choosing a research project? Ever wondered how your work will be marked? This book will help students to understand the coursework specifications and marking criteria for a number of key exam boards, including; AQA (specification A and B), OCR, EDEXCEL and SQA. It provides specific and highly relevant advice on how to maximise achievement in coursework. Guidance is offered on how best to choose a research project, through to practical advice on how to carry out research and write up reports. Topics to be avoided are also considered and advice on how to navigate the difficulties and avoid common pitfalls provided. Key issues covered include:

- * An overview of the main methods of investigation in psychology*
- * Data analysis, including how to present data in Word and Excel and how best to comment on it*
- * How to draw conclusions from data and create inferential statistics. Incorporating a series of examples, including an investigation from start to finish, and a laboratory experiment, this book provides clear, hands-on advice. It will be an invaluable tool for GCSE, AS and A2 students, helping them to maintain their motivation through coursework assignments and to achieve their potential.*

The Texture of Images Apr 12 2021 Textures of Images presents for the first time a fundamental analysis and synopsis of the printed relic-book genre. The author brings into focus the specific mediality and aesthetics of this kind of printed books between the Late Middle Ages and the Early Modern Period.

Appendix Project Mar 24 2022 On the ongoing project of writing about grief; Zambreno's addendum to Book of Mutter. "I came up with the idea of writing these notes, or talks, out of a primary desire to not read from Book of Mutter, and instead to keep gesturing to its incompleteness and ongoingness, which connects, for me, to the fragmentary project of literature, and what I long for in writing." —from Appendix Project Inspired by the lectures of Roland Barthes, Anne Carson, and Jorge Luis Borges, Kate Zambreno's Appendix Project collects eleven talks and essays written in the course of the year following the publication of Book of Mutter, Zambreno's book on her mother that took her over a decade to write. These surprising and moving performances, underscored by the sleeplessness of the first year of her child's life, contain Zambreno's most original and dazzling thinking and writing to date. In Appendix Project Zambreno thinks through the work of On Kawara, Roland Barthes, W.G. Sebald, Bhanu Kapil, Walter Benjamin, Theresa Hak Kyung Cha, Marguerite Duras, Marlene Dumas, Louise Bourgeois, Doris Salcedo, Jenny Holzer, and more.

The Empathy Exams Oct 31 2022 The subjects of this stylish and audacious collection of essays range from an assault in Nicaragua to a Morgellons meeting; from Frida Kahlo's plaster casts to a gangland tour of LA. Jamison is interested in how we tell stories about injury and pain, and the limits that circumstances, bodies and identity put on the act of describing.
