2011 Dec 25 2019 Samy et Armael sont deux personnes débridées qui aiment la drogue et le rock'n'roll. Alors que Armael tombe amoureux et s'efface de la vie de noctambule cherbourgeoise, Samy, lui, s'enfoncé dans les trafics. Après l'échec de sa relation sentimentale avec Camille, Samy prend une maison qu'il partage avec son complice, Armael. L'alcool et la drogue coulent à flots jusqu'à un matin où la police se mêle de leurs petites affaires... À PROPOS DE L'AUTEUR Pour Erwan Garel Lebrun, l'écriture est une nécessité viscérale. Il commença par des textes de chansons puis des essais littéraires et des fictions quelquefois basées sur sa vie. 2011 représente pour lui une période charnière, la fin d'un mode de vie destructeur afin de se consacrer au changement entraîné par la naissance de son fils.

Diesel Particulate Emissions Landmark Research 1994-2001 Aug 13 2021 The need for manufacturers to meet U.S. Environmental Protection Agency (EPA) mobile source diesel emissions standards for on-highway light duty and heavy duty vehicles has been the driving force for the control of diesel particulate and NOx emissions reductions. Diesel Particulate Emissions: Landmark Research 1994-2001 contains the latest research and development findings that will help guide engineers to achieve low particulate emissions from future engines. Based on extensive SAE literature from the past seven years, the 45 papers in this book have been selected from the SAE Transactions Journals.

Lightweight Thermoset Composites Mar 08 2021 This report reviewed some of the resin systems used for these lightc099 applications, the reinforcements employed and the techniques developed and used to convert them efficiently and as economically as possible into components and structures.

Plastics in European Cars, 2000-2008 Jun 23 2022 This report examines the application of plastics in European cars in the middle of the year 2000. It evaluates the changes in use and considers possible developments over the next decade. The use of plastics for specific components is examined, comparison is made between competitive materials and examples of commercial application are included. Estimates are presented for current plastics usage in European cars with forecasts to 2008.

Composites for Automotive Applications Apr 09 2021 Various factors in the automotive sector have combined to create a favourable climate for the development of materials and fabrication techniques for polymer-based composite body panels and structures. The cond104 in which composites are used within the automotive industry has been reviewed in this report and those materials and processes that are used in the fabrication of components and structures are described in detail. For this reason, this report is essential reading for the composites, plastics industries and the land transport/automotive sectors. An additional indexed section containing several hundred abstracts from the Rapra Polymer Library database gives useful references for further reading.

Microwave Processing of Materials V: Volume 430 Jun 11 2021 Based on an international gathering of scientists and engineers from 17 countries, this book, the fifth in a continuing series, assesses microwave processing of materials as an emerging technology. Significant advances in understanding and control of microwave energy and its use in the processing and testing of materials are outlined. Future research and development needs are also explored. Topics include: scale-up and commercialization; microwave nondestructive testing; microwave processing; microwave system design; dielectric properties measurements and analysis; modelling of microwave heating; microwave interactions and mechanisms; microwave processing using variable frequency sources; alternate microwave sources; remediation of hazardous waste; temperature modelling and measurements; microwave processing of polymers; and plasma processing.

Citroën Jan 06 2021 In this new view of the Citroën story, automotive/aviation writer and design specialist Lance Cole investigates not just the details of the cars of Citroën, but the aeronautical and cultural origins that lay behind Citroën's form and function. The book digs deep into the ethos of Automobiles Citroën to create a narrative on one of the greatest car manufacturers in history. Using interviews, translations, archive documents and specially-commissioned photographs, the Citroën journey is cast in a fresh perspective. It explains in detail the influences upon Citroën design: Voisin, Lefebvre, Bertoni, Boulanger, Mages, Opron and recent Citroën designers such as Coco, Blakeslee and Soubirou. As well as all the men of the great period of 1920s-1970s expansion, it also cites less well-known names of Citroën's French engineering, design, and influence such as Cayla, Gerin, Giret, Harmand, Dargent and others, to give a full picture of Citroën heritage. The book provides in-depth analysis of all major Citroën models with an engineering and design focus and profiles key individuals and cars up to the present day and Citroën's 'DS'-branded resurgence. It features many newly commissioned photographs, rare archive drawings and interviews with Citroën owners. Researched amongst leading Citroën experts and restorers, Lance Cole provides a fresh perspective on the Citroën car manufacturer, its design language and the legacy of its extraordinary engineering which will be of great interest to all Citroën and motoring enthusiasts. Superbly illustrated with 329 colour photographs, many newly commissioned along with rare archive drawings.

Local Language, Literacy and Multilingualism in a West African Society May 10 2021 This book aims to enhance and challenge our understanding of language and literacy as social practice against the background of heightened globalisation. Juffermans presents an ethnographic study of the linguistic landscape of The Gambia, arguing that language should be conceptualised as a verb (languageing) rather than a countable noun (a language, languages). He goes on to argue that sociolinguistics should not be defined as the study of 'who speaks what language to whom, and when and to what end' (as Fishman defined it), but as the study of who uses which linguistic features under particular circumstances in a particular place and time. The book is therefore in part an exercise to unpluralise language, which Juffermans argues is necessary for a more realistic understanding of what language is, what it does, and what people do with it. The book will be of interest to sociolinguistics researchers, especially those focusing on Africa and the global South.

Plastics Jun 30 2020 This book is for anyone interested in plastics. The emphasis is on the uses of plastics and on the multitude of applications in which plastics enrich (or complicate) our lives. Due coverage is given to environmental issues (recycling, the uses of resources, etc.) Recommended reading for those professionally involved, for those with a general interest in the subject and as a school and university text.

The Historical Roots of Technical Communication in the Chinese Tradition Dec 05 2020 This book traces Chinese technical communication from its beginnings, investigating how it began and the major factors that shaped its practice. It also looks at the major philosophical and historical traditions in Chinese technical communication, and how historical and philosophical threads play out in contemporary Chinese technical communication practice. In considering such issues, the book gives attention to some of the major classical Chinese texts, but treats them as artefacts of technical communication. It explores the roots of Chinese technical communication, reviews traditional philosophy that has shaped such practice, discusses the key links in the history of Chinese technical communication, and recounts historical roots and contemporary practice side by side. It provides the reader with compelling perspectives on the historical roots of Chinese technical communication.

Battlefield 3 Dec 17 2021 As bullets whiz by, walls crumble, and explosions throw you to the ground, the battlefield feels more alive and interactive than ever before. In Battlefield 3, players step into the role of the elite U.S. Marines where they will experience heart-pounding missions across diverse locations including Paris, Tehran and New York... Since 2002, EA's series of Battlefield games have set the standard for realism and ambition. And in Autumn 2011, with the global release of the hotly anticipated Battlefield 3, they're raising the bar even higher. Battlefield 3 will be the most authentic, vivid, all-action first person shooter ever. To be published alongside the game, Battlefield 3: The Russian is also best in class - the first time that a games publisher has worked so closely with an internationally bestselling author. Never before has a tie-in book benefitted from this level of collaboration from the creative team behind the game itself. Nor has it been written by a thriller writer with such a strong track record and reputation. Displaying all of McNab's trademark grit, authenticity and insight, Battlefield 3: The Russian is a scorching top-of-the-line military thriller and a heart-stopping race against time. Prepare to be blown away... Andy McNab joined the infantry as a boy soldier. In 1984 he was 'badged' as a member of 22 SAS Regiment and was involved in both covert and overt special operations worldwide. During the Gulf War he commanded Bravo Two Zero, a patrol that, in the words of his commanding officer, 'will remain in regimental history for ever'. Awarded both the Distinguished Conduct Medal (DCM) and Military Medal (MM) during his military career, McNab was the British Army's most highly decorated serving soldier when he finally left the SAS in February 1993. He wrote about his experiences in three books: the phenomenal bestseller Bravo Two Zero, Immediate Action and Seven Troop. He is the author of the bestselling Nick Stone thrillers. Besides his writing work, he lectures to security and intelligence agencies in both the USA and UK. He is a patron of the Help for Heroes campaign.
