The only comprehensive examination of Eisenhower's Executive Office. If there had been all-news television channels in 1956, viewers around the world would have been glued to their sets between October 23 and November 4. This book tells the story of the Hungarian Revolution in 120 original documents, ranging from the minutes of the first meeting of Khrushchev with Hungarian bosses after Stalin's death in 1953 to Yeltsin's declaration made in 1992. Other documents include letters from Yuri Andropov, Soviet Ambassador in Budapest during and after the revolt. The great majority of the material appears in English for the first time, and almost all come from archives that were inaccessible until the 1990s. "The sixth edition begins with a brief introduction into foreign policymaking and the case study approach. Thirteen original case studies written expressly for this edited volume then follow. The cases deal with a wide range of policy areas: national security, homeland security, diplomacy, trade, immigration, epidemics, climate change, and Russian interference in the 2016 presidential election"-- Contents: Intro.; Admin. One episode dominates the memory of Lyndon Johnson's presidency: the Vietnam War. The war has so darkened Johnson's reputation that it is difficult for many to recall his policies in a positive light-- especially his foreign policy. Now historian H.W. Brands offers a fresh look at Johnson's handling of international relations, putting Vietnam in the context of the many crises he confronted and the outdated policies of global containment he was expected to uphold. The result is a fascinating portrait of a master politician at work, maneuvering through a series of successes that made his ultimate failure in Vietnam all the more tragic. In *The Wages of Globalism*, Brands conducts a witty and insightful tour through LBJ's foreign policy--a tour that begins in Washington, runs through Santa Domingo, Nicosia, and Jakarta, and ends in Saigon. He opens with a thoughtful portrayal of the tense, often fruitful relationship between the domineering Johnson and his advisers--Dean Rusk, Robert McNamara, George Ball, Clark Clifford, Walt Rostow--as he picked up Kennedy's legacy and sought to make it his own. Leaving Vietnam for the end, Brands presents the various crises with all the force the White House felt at the time: the Dominican intervention, India impending famine and war with Pakistan, the coup against Sukarno in Indonesia, France's departure from NATO's unified command, the threat of fighting between Greece and Turkey over Cyprus, the Six Day War, and the worry that Germany might acquire nuclear weapons. In each, Brands captures the uncertainty in Washington and the conflicting advice that Johnson received. The picture

that emerges is remarkably positive, revealing the president's ability to pick his way through fierce complexities. He forcefully stopped a war over Cyprus; handled de Gaulle with equanimity and skill; and--over the objections of all his advisers--intentionally delayed shipping grain to famine-threatened India, creating a real momentum for agricultural reform in that country that ultimately led to self-sufficiency. Only in Vietnam did Johnson's sure balance of determination and judgment break down: worried about his domestic program and the need to stand firm against aggression, he let his determination run away with him. "In 1947," H.W. Brands writes, "Truman made a bad bargain with history." By the time Johnson inherited the White House, it had become painfully clear that America was no longer supreme in the world, able to prop up the status quo worldwide. In this fascinating, behind-the-scenes account, Brands shows how skillfully Johnson steered the nation into the new era--until, in Southeast Asia, politics and his own personality led him into the ultimate trap of the Truman Doctrine. Foreign Relations of the United States, 1964-1954 Iran, 2nd Edition Prospective homeschoolers are parents looking for an alternative to the mainstream educational system for their offspring. But homeschooling children at high school level strikes fear into even the most dedicated of homeschoolers. They need information and answers to their questions. And with the current educational and unemployment problems in South Africa, young people need clear direction and guidance to help them achieve their goals. In addition to exploring the popular ways to gaining a recognised matric certificate outside the formal school system, Homeschooling High School also challenges readers to rethink their values, particularly the value they place on certification, and to consider some unconventional or alternative paths to success. In a clearly presented format, the book includes advice on legal matters, identifying appropriate courses, sourcing study material, tips on entrepreneurship, financing tertiary studies and the testimonies of successful homeschooled graduates. Homeschooling High School is a comprehensive guide to plotting a path through high school and beyond. From the end of World War II down to the dissolution of the Soviet Union, the primary objective of U.S. foreign policy has been to prevent the expansion of communism. Indeed, that objective was directly embodied in the so-called strategy of

containment, a global approach to the pursuit of U.S. national security interests that was first adumbrated by George F. Kennan in 1947 and later became the guiding force in U.S. foreign policy. At first, the concept of containment was applied primarily to Europe. It was there that the threat to U.S. interests from international communism directed from Moscow was first perceived, in the form of Soviet efforts to dominate the nations of Eastern Europe and extend Soviet influence into the eastern Mediterranean and the Middle East. Other areas of the world—Asia, Africa, and Latin America—were considered to be less threatened by forces hostile to the free world or more peripheral to U.S. foreign policy concerns. At least that was the view initially proclaimed by George Kennan himself, who identified five areas in the world as vital to the United States: North America, Great Britain, Central Europe, the USSR, and Japan. Only the latter was located in Asia. By the end of the decade, however, the focus of U.S. containment strategy was extended to include East and Southeast Asia, primarily because of the increasing likelihood of a communist victory in the Chinese Civil War, which, in the minds of some U.S. policymakers, would be tantamount to giving the Soviet Union a dominant position on the Asian mainland. Added to the growing threat in China was the increasingly unstable situation in Southeast Asia, where the long arc of colonies that had been established by the imperialist powers during the last half of the nineteenth century was gradually but inexorably being replaced by independent states. The emergence of such colonial territories into independence was generally viewed as a welcome prospect by foreign policy observers in Washington, but when combined with the impending victory of communist forces in China it raised the unsettling possibility that the entire region might be brought within the reach of the Kremlin. Waging Peace offers the first fully comprehensive study of Eisenhower's "New Look" program of national security, which provided the groundwork for the next three decades of America's Cold War strategy. Though the Cold War itself and the idea of containment originated under Truman, it was left to Eisenhower to develop the first coherent and sustainable strategy for addressing the issues unique to the nuclear age. To this end, he designated a decision-making system

centered around the National Security Council to take full advantage of the expertise and data from various departments and agencies and of the judgment of his principal advisors. The result was the formation of a "long haul" strategy of preventing war and Soviet expansion and of mitigating Soviet hostility. Only now, in the aftermath of the Cold War, can Eisenhower's achievement be fully appreciated. This book will be of much interest to scholars and students of the Eisenhower era, diplomatic history, the Cold War, and contemporary foreign policy. A long-time U.S. policy insider's scholarly and encyclopedic history with unprecedented analysis of the official documents of the Cold War explores Reagan's integrated new strategies in defense, arms control, diplomacy, information and intelligence, and support for the faiths and forces of freedom that collapsed the Soviet ideology and empire. The research reported in Caught in the Act draws together the insights gained from a continuous professional development initiative for high school mathematics teachers, teaching in low socio-economic status and socially challenged environments in South Africa. The chapters show the possibilities for enhancing achievement in school mathematics if a strength-based approach is adopted to develop teaching with teachers and when their concerns are taken seriously. The book demonstrates that the ecological relevance - fitness for the context in which teachers are teaching - of the "goods" developed and

distributed by initiatives should be a major consideration to offer hope for sustainable implementation to improve school mathematics education. The book is of interest to mathematics teachers, school leaders, mathematics curriculum advisors, policy makers and researchers. This book highlights the development and outcomes of research on and practical experience in science education in Taiwan. As the outcomes of the scholarship on science education in Taiwan have garnered attention in science education communities around the world, this book gathers the most relevant research on Taiwan, presenting it in a cohesive overview that will move science education forward in terms of policy, research and practice.
