Church History Study Guide, Pt. 1 Feb 29 2020 Church History Study Guide, Pt. 1: 1805 to 1832. This volume is the first of three on Church History and the Doctrine and Covenants. It covers Church history and the revelations in the Doctrine and Covenants from the birth of Joseph Smith in 1805 through the beginnings of the Kirtland and Missouri periods. We learn concerning the First Vision, the coming forth of the Book of Mormon, the restoration of the priesthood, and many early revelations given to individual members of the Church. We study the organization of the Church in 1830 and the migration of the Saints to Kirtland, Ohio, where the law and order of the Church is given, the law of consecration begins, and spiritual gifts are manifested. We also read concerning the early events in Missouri, where the land of Zion is dedicated for the gathering of the Saints. In all, it covers 27 years of Church History, and covers sections 1-99 of the Doctrine and Covenants and the Joseph Smith History in the Pearl of Great Price. The cover features "Young Joseph," a painting of the Prophet Joseph Smith pondering in the Sacred Grove, by Walter Rane.

Modelling Accelerated Proficiency in Organisations Dec 29 2019 This book presents a research thesis of a large-scale study conducted with over 50 large organizations in 7 countries with 80 business leaders to understand how businesses speed up the proficiency of their employees to meet business challenges. The book describes a start-to-end research study that explored the concept of 'accelerated proficiency' of employees in organizations. The book is organized into five chapters. The book introduces the concept of accelerated proficiency in a business context in light of reviews of four decades of classic studies. The research methodology to identify sources, recruit participants, and the mechanism to collect as well as analyze data have been explained in detail. The book reveals six business practices implemented by organizations across the board that seem to make a major impact in shortening the time to proficiency of employees. Important observations and findings have been discussed as implications in regards to how organizations orchestrated six business practices as an input-output-feedback system to reduce the time-to-proficiency of the workforce. The book briefly explains how these six practices were implemented through a set of twenty-four strategies in various contexts. The concepts and findings discussed in this book contribute significantly to the body of knowledge on accelerated proficiency. In particular, the conceptual model and the framework developed in this study can be implemented across a range of contexts, business sectors, job types, and settings to reduce the time-to-proficiency of the workforce.

Generation X Jul 04 2020 Andy, Dag and Claire have been handed a society beyond their means. Twentysomethings, brought up with divorce, Watergate and Three Mile Island, and scarred by the 80s fallout of yuppies, recession, crack and Ronald Reagan, they represent the new generation-Generation X. Fiercely suspicious of being lumped together as an advertiser's target market, they have quit dreary careers and cut themselves adrift in the California desert. Unsure of their futures, they immerse themselves in a regime of heavy drinking and working in no future McJobs in the service industry. Underemployed, overeducated and intensely private and unpredictable, they have nowhere to direct their anger, no one to assuage their fears, and no culture to replace their anomie. So they tell stories: disturbingly funny tales that reveal their barricaded inner world. A world populated with dead TV shows, 'Elvis moments' and semi-disposable Swedish furniture.
