In this edited collection, the authors pick up the communities of practice (CoP) approach of sharing practice in their reflection on the experience of taking their CoP vision from a dream to reality. Their stories articulate the vision, the passion and the challenge of working within and/or changing existing institutional culture and practice. The book discusses strategies that worked and considers the lessons learnt to inspire future dreamers and schemers. The multiple perspectives provided in the case studies will assist higher education leaders, as well as academic and professional staff, in establishing or assessing CoPs. The book offers insights into implementation strategies, practical guidelines and ideas on how CoP theoretical underpinnings can be tailored to the higher education context. "Internships: Theory and Practice" focuses on the history, theory, value, design, administration, and evaluation of professional internships as an educational experience for college students. Internships are guided, pre-professional experiences that combine academic and professional components as a managed transition to professional careers. Touted by many as an educational innovation for the 21st century, internships (or experiential learning, or apprenticeships, as they once were called) have been a staple of professional preparation for centuries, dating back at least to the earliest documentation in the Middle Ages and no doubt far beyond that. Charles Sides and Ann Mrvica trace this history through primary sources to explore the development of internship experiences over the past 800 years, create an introduction to the topic of internships, and provide a foundation for modern college-corporation partnerships in professional education and training. The authors present specific guidelines and discussions on issues important to corporations, in terms of providing for internship experiences; issues important to colleges, in terms of designing and evaluating internships; and issues important to students, in terms of participating in and learning from internships. How do networks create educational change and improve student achievement? What kinds of educational policies and practices facilitate network learning? Networks bring teachers, principals and other stakeholders together to share ideas, observe best practices, identify and analyze problems, and develop strategies for improved teaching, learning, and community life. These networks are becoming an important method to enhance educational renewal and student achievement. Networks go beyond tensions of top-down vs. bottom-up, school development and formal and informal organizational structures. The theoretical base of networking makes use of many different concepts of educational change theory, such as educational change processes, empowering of teachers, professional development, communities of practice, the network society and democratic education. The first part of the book features studies of four 'established' networks who have been functioning for several years. These networks describe their accomplishments, challenges, goals, and the theoretical basis of their work. In the second part of the book, three recently developed networks share their 'start-up' experiences and lessons learned. The book concludes by looking at networking as a strategy for educational change. Key reading for Education students, educational consultants and teacher educators with an interest in educational leadership and educational change.
